Biomagnetic Pair Scan Report

REPORT **YH-000005-20261021-R1**

FINAL

PATIENT

PATIENT
Jane Sample

DATE OF BIRTH
Jan 1, 1980

AGE AT SESSION
46 y

SEX
Female

MEDICAL RECORD NUMBER (MRN)
YH-000005

SESSION

DATE & TIME
Oct 21, 2026, 4:29 PM

METHODOLOGY
Biomagnetism

PRACTITIONER
Dr. Alex Demo

PROTOCOLS RUN
19. Leg Circulation

CHIEF COMPLAINT
Heavy legs, evening ankle swelling

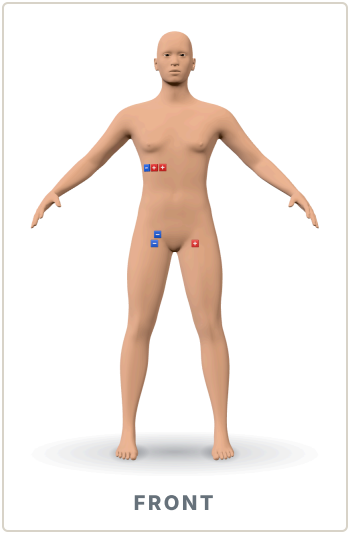

RESULTS

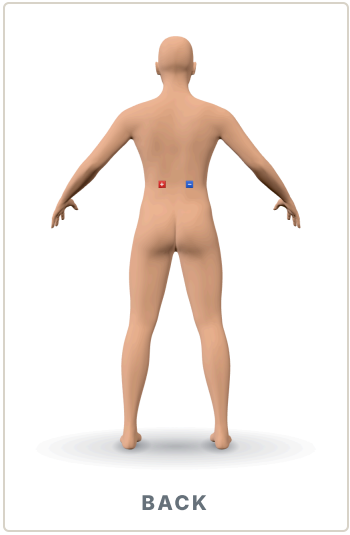

4 findings · Found 3 · Impacted 1

#	PAIR	TRACKING POINT	IMPACT POINT	RELATED TO	F/P/R	STATUS	DWELL
VIRUS · 2							
1	PB 36 **Liver – Liver** INFILTRATE	Liver	Liver	Hepatitis C	F ●●● P ●●● R ●●○	● FOUND	15 min
4	PB 18 **Inguinal nerve (R/L) – Liver**	Inguinal (ilioinguinal) nerve (R)	Liver	Roseola	F ●○○ P ●○○ R ●●●	● FOUND	15 min
BACTERIA · 1							
2	PB 97 **Kidney (R) – Kidney (L)**	Kidney (R)	Kidney (L)	Clostridium tetani	F ●●● P ●●● R ●●●	■ IMPACTED	15 min
COMPLEX · 1							
3	**Inguinal fold (R) – Inguinal fold (L)**	Inguinal fold (groin crease) (R)	Inguinal fold (groin crease) (L)	—	—	● FOUND	15 min

Findings are complementary observations "related to" the listed entities — never a diagnosis. F/P/R: frequency, pathogenicity, resolution (1–3). Sides: R right, L left; qualifiers: S superior, Inf inferior, A anterior, P posterior, Lat lateral.

BODY MAPS

− Tracking point · negative (−)

+ Impact point · positive (+)

Numbers match the result rows.

SYMPTOMS REPORTED

Asthenia (fatigue) · General Headache · Neurological

FOLLOW-UP

Wednesday, October 28, 2026

A follow-up scan is recommended after one week (reservoir release).

RECOMMENDATIONS

For the pairs found

- **PB 36 Liver – Liver:** Look for the cause of the poisoning (Food, drinks, solvents, chemicals, aerosols, etc.) · Complement with detoxification BPs · Positioning. Negative magnet in front, positive magnet behind · During Dr. Isaac Goiz Durán's scans it responds as Toxicity
- **PB 97 Kidney (R) – Kidney (L):** Most frequent BP · Promotes diuresis · Magnet-directed scan and prophylactic impaction in: Arterial hypertension · Magnet-directed scan and prophylactic impaction in: Fluid retention (edema) · Magnet-directed scan and prophylactic impaction in: Oliguria, anuria, dysuria or UTI · Magnet-directed scan and prophylactic impaction in: Kidney Failure · Magnet-directed scan and prophylactic impaction in: Poisonings and intoxications · Do not impact in cases of dehydration or severe hemorrhage
- **PB 18 Inguinal nerve (R/L) – Liver:** In case of dermatological symptoms, magnet-directed scan for Exanthematous diseases (BP 14-20) · The negative magnet can be placed on Inguinal nerve (R), Inguinal nerve (L) or both

General

- **General recommendations (short version):** 1. Change toothbrush *(always included)*

Summaries of the general guidance — your practitioner can provide the full recommendation sheets.

PRACTITIONER ATTESTATION

I attest that this report accurately reflects the findings of the session described above.

SCOPE OF THIS REPORT

Biomagnetic Pair findings are complementary, non-diagnostic observations. They do not identify disease and do not replace evaluation, diagnosis or treatment by a licensed physician. Continue all medical indications.

Findings are reported as "related to" — never as a diagnosis.
